

Learning assessment for students

This form will help us get a better picture of you as a student and offers an opportunity for reflection on your own learning process.

Name:

1. What knowledge do you want to gain and develop during the courses?

2. What academic and practical skills do you want to develop during the courses?

3. What kind of metaskills do you think are central to your future work life?

Neumeier (2012): "believes that the metaskills we need in a post-industrial economy are feeling (intuition and empathy), seeing (systems thinking), dreaming (applied imagination), making (design), and learning (autodidactics)."

Continued on the next page!

4. In what kind of situation(s) do you learn best? Describe or give an example.

5. What do you expect your fellow students to contribute with during the courses?

6. What do you expect from yourself during the courses?
