

TPFH Part 5 | **Synthesis & conclusions**

Welcome the fifth and final part of the course *Technology, Power and the Future of Humanity!* In the course, we have explored how technology is entangled in a range of social and environmental issues. The purpose of the final part of the course is to explore broader trends and themes from the course. It proved difficult to find a time that suits everybody for a live online seminar on the 26th, so instead of an online meeting we will sum up the course in the following way:

Prepare and record a personal reflection on the course themes as a five minute video or audio podcast. And upload to Studentportalen at Wednesday, May 25th at the latest. Possible themes to discuss:

- a) What are the key ideas and perspectives that you will take with you from the course?
- b) What is the role of technology in sustainable development?
- c) What is your take on the future of technological development – and technology, power and humanity?

The videos will be made available to all course participants. In order to get a concluding discussion going, we will create a forum at Studentportalen, where we ask you to reflect on each others podcasts.

Good luck!

Jakob & Daniel
